

Creep Nucleus

4 FIRST WEEKS OF LIFE

Product description:

Nucleus for piglets up to one week after weaning.

Indications:

Essential in weanings at 21 days or earlier.

In later weanings, it is advisable to supply it up to 2-3 days after weaning.

Very suitable for those farms that look for:

- Good adaptation in the post-weaning week. Using PRODUMIX nucleus in the manufacturing of Creep feed, the most progressive adaptation to solid feed is achieved.
- Palatability and feed intake are improved in the first week after weaning.
- Avoids diarrhoea.

Instructions for use:

Use it according to the formula, in piglets Stage 1 (Creep feed).

Simple formulation (PRODUMIX R + D + i) with crude cereals and soybean meal.

Presentation:

Package: 27,5 Kg. bags and 1.000 Kg. Big-Bags (*check availability in your home market*)
