

Pre Starter

0-6 WEEKS OF LIFE

Product description:

Nucleus for piglets up to 42 days of life.

Indications:

In weanings at 21 days or earlier, supply after the PRODUMIX Creep feed.
In weanings at 28 days or later, supply in farrowing and up to 42 days of life. It is advisable to supply PRODUMIX Creep feed to 15% of the smallest piglets at weaning

Very suitable in those farms that look for:

- Good structure of the muscle-locomotive apparatus of the piglets, that allows a better growth in later stages.
- Optimum development of the digestive system.
- Homogeneity: Piglets totally equalized, which makes the litter management easier and avoids runts, not economically valid.
- Growth: Up to one extra kg. as compared to alternative programs.

Instructions for use:

Use it according to the formula, in piglets Stage 2 (Pre Starter).

Simple formulation (PRODUMIX R + D + i) with crude cereals and soybean meal.

Presentation:

Package: 20 to 32,5 Kg. bags and 1.000 Kg. Big-Bag (*check availability in your home market*)
